

At the Environmental Fair, the City of Pocatello's Lead Safe and Healthy Homes program will offer **FREE** lead hazard testing.*

Examples of items to bring and have tested are toys, trinkets, pottery and ceramics, costume jewelry, small painted items, vintage glassware, small appliances/utensils, and paint chips.

Guidelines for having items tested:

- Limited to 4 items per household
- All tested items have to be at least a quarter in size or larger
- Bring items in individual sealable plastic bags or trash bags
- **NO liquid paint, fluid substances, or soil will be tested**

*The City of Pocatello will only offer this service as a courtesy. An NLLAP-certified laboratory should test all items for a more definitive analysis and testing results.
